

"upliftment and empowerment through education and training"

EFFECTIVE OUTCOME BASED TRAINING THAT INCREASES PRODUCTIVITY AND ADDS TO PROFITABILITY

Skills development training focuses on up- skilling and re-skilling individuals in a particular vocation/task/job or career path. It aims to ensure that individuals are competent in their area of expertise and ensures that any skills programmes or courses completed add to the efficiency of their job at hand. It involves outcomes based training, where learners actually "do" and practice what they are taught.

Prior to certificates being issued, learners need to prove their competence against a set of outcomes and associated assessment criteria by completing projects, written assessments or portfolios of evidence.

WHY USE YONKE ENVIRONMENTAL SOLUTIONS?

Yonke Environmental Solutions is a private Training Provider committed to the success of its learners, stakeholders and the transport and warehousing sector as a whole. Yonke prides itself in offering dynamic training courses at the most cost effective prices, using professionally trained facilitators and full accredited assessors.

We are a fully accredited with the Transport Education and Training Authorities as well as an Authorised Training Body for the Department of Transport.

RECEIVING, HANDLING AND DISPATCHING FREIGHT

Based on SAQA Unit Standards 8024 and 8036

A learner will now be capable of demonstrating an integrated practical and theoretical knowledge of receipt, dispatch and returns of freight procedures, based on quality service to the customer and product care. The learner will be able to accept additional responsibility through knowledge of the whole process.

OUTCOMES

By the end of the course, the learners will be to:

- Identify non-conforming freight on arrival and departure and deal with freight in accordance with company policy and procedures
- Assess the quality of packaging to take corrective actions to ensure the safe handling
- Determine the correct type and quantity of units that are received, dispatched or internally moved in accordance with authorised documentation – deal with discrepancies in accordance with company policies and procedures and customer requirements.
- Place and store freight, giving cognisance to product type storage requirements, appropriate storage facility, as well time and transport resource, in order that freight can be easily located and well preserved.
