

"upliftment and empowerment through education and training"

EFFECTIVE OUTCOME BASED TRAINING THAT INCREASES PRODUCTIVITY AND ADDS TO PROFITABILITY

Skills development training focuses on up- skilling and re-skilling individuals in a particular vocation/task/job or career path. It aims to ensure that individuals are competent in their area of expertise and ensures that any skills programmes or courses completed add to the efficiency of their job at hand. It involves outcomes based training, where learners actually "do" and practice what they are taught.

Prior to certificates being issued, learners need to prove their competence against a set of outcomes and associated assessment criteria by completing projects, written assessments or portfolios of evidence.

WHY USE YONKE ENVIRONMENTAL SOLUTIONS?

Yonke Environmental Solutions is a private Training Provider committed to the success of its learners, stakeholders and the transport and warehousing sector as a whole. Yonke prides itself in offering dynamic training courses at the most cost effective prices, using professionally trained facilitators and full accredited assessors.

We are a fully accredited with the Transport Education and Training Authorities as well as an Authorised Training Body for the Department of Transport.

COST

This is dependent on organisational needs, number of driver trainers needed and number of drivers that are enrolled on the programme.
